

22 December 1977

MEMORANDUM FOR: Director, ODP

STATINTL FROM : [REDACTED]  
Deputy Director for Processing

SUBJECT : Processing Weekly Report

Tasks Accomplished

- STATINTL 1. The cables for the Amdahl 470/V6 test configuration were installed on 17 December. The hardware arrived on 22 December and is being installed. ODP is to begin testing on 27 December. [REDACTED]
2. SVS Level I/Hasp was implemented on the 370/158 Red and Blue machines on 16 December. Several problems have been experienced and SPD is working on solutions. [REDACTED] STATINTL
3. The Claims and Compensation application was converted from EAM processing to the 360/20. It is estimated that monthly processing time will be reduced by one hour and year-end processing reduced by six hours.
- STATINTL 4. A new Comten software package has been implemented in the Special Center. This new software supports use of the enter key password suppression, and a prompt character while running Delta Data terminals to IBM 2741 applications. [REDACTED]
5. Hetra has agreed to supply a new print head on an RJE in 5D55 to eliminate the replacing of hammer drives every few days. [REDACTED] STATINTL

Problems

- STATINTL 1. The GIM printer at [REDACTED] Building is still experiencing occasional garbling of print lines. ED and SPD are working on the problem. [REDACTED]
- STATINTL 2. ED personnel have been working with two Comten programmers in an effort to implement a test version of the accounting package. However, there are still some problems that have not yet been resolved. [REDACTED]
- STATINTL [REDACTED]
